

**PES Diabetes Information System
Flow Sheet**

Date of report: 10/18/2006
Patient Name: ED DAWSON
DOB: 02/22/1937
MRN: 5442280

Physician: William Osler, MD

Other clinical targets in diabetes:

- Aspirin therapy
- BP < 130/80 _____
- Pneumonia vaccine
- Flue vaccine annually
- Eye exam annually
- BMI < 25 _____

A1C (Desirable range <7%)

Test date	Result	
07/27/2006	8.5	
05/23/2006	9.0	Poor glycemic control. Intensify therapy, including medications and life style changes.
04/28/2006	9.6	Recheck A1C every 3 months.
02/02/2006	10.1	

M:C Ratio (Normal <30. Borderline high 30–300 mg/gm)

Test date	Result	
07/29/2005	57.8	Microalbuminuria present. Confirm that the patient is using an ACE inhibitor or Angiotensin Receptor Blocker (ARB).
11/01/2004	42.9	
02/09/2004	36.5	

Creatinine (Normal <1.5 mg/dl men; <1.4 women)

Test date	Result	
04/05/2006	0.9	
03/22/2006	0.9	Normal renal function. Recheck annually.
12/02/2005	0.8	
11/29/2005	0.8	

Serum Lipid Profile (Desirable LDL <100 mg/dl. Desirable HDL >35 mg/dl men; >40 mg/dl women)

Test Date	Result				
	TC	TRIG	HDL	LDL	
10/17/2006	234	145	49	156	Poor lipid control. Intensify therapy including medications and lifestyle changes. Recheck every 3 months.
11/26/2005	213	137	48	138	
02/09/2005	214	165	39	142	
11/01/2004	222	110	40	160
